Balanegra, 29 May 2007

Dear Customer,

We are pleased to inform you about several measures developed in CABASC in the current campaign that can and should help to improve our future relations. I will describe them in detail below:

- 1- Significant efforts have been made in our Quality Policy, which have resulted in new certifications that are added to those already existing, UNE 155000 from AENOR (we were the first company certified in the year 1998), EUREP Protocol for all our products in the entire surface area, APPCC. The new certificates are: BRC, IFS and ISO 9001:2000, which endorse our quality system and all the processes, complying with the requirements of the European markets.
- 2- Biological control has begun on several products (Peppers, Beans, Eggplants, Watermelon ...) with the advice of Koppert. CABASC was also incorporated in the form of an API (Integrated Production Group), backed by certification of the Regional Government of Andalusia.
- 3- In the upcoming 2007/2008 campaign, the Biological Control will be a full reality, with 70% of the total of the surface area under this cultivating method, 100% in the case of peppers.
- 4- These measures and advances are associated with an increase in our volume thanks to the incorporation of new partners to our project, with future forecasts of continued growth.
- 5- These changes must be appropriately accompanied by a new image, and for this reason a new trademark has been incorporated: BERGIE, in addition to renewing the image of our historical trademark: AMBITO, both accompanied by the slogan that intends to endorse our position regarding quality, food safety, integrated production, own production ...
- 6- Just as the image of our products has been renewed, the GS quality seal also commences a new stage with GS GREEN, with stricter regulations, directed exclusively at biological production, and with a warranty from each participating company of 100,000 Euros that guarantees the safety of our products.

We are sure that these advances will contribute to our future commercial strategy, and will facilitate our expansion for which we count on your collaboration. We want to invite you to participate with us in this new project and we are open to your suggestions and current and future needs in order to continue meeting your expectations.

Sincerely,

JESUS NAVARRO LOPEZ
SALES MANAGER
